Smart toilet installation

Before installation, open the Angle valve to drain water for 1-2 minutes and clear the embedded water pipe. Impurities and sludge to avoid clogging affect the cleaning function of the smart toilet.

ADJUSTABLE WALL DRAIN

INSTALLATION EXAMPLE

① The sealing ring of the white joint, after gluing, covers the toilet drain.

② Stretchable length
Short tube 20-29cm, long tube 29-50cm

With the other end glued,
Put into the wall drain, glue smooth.

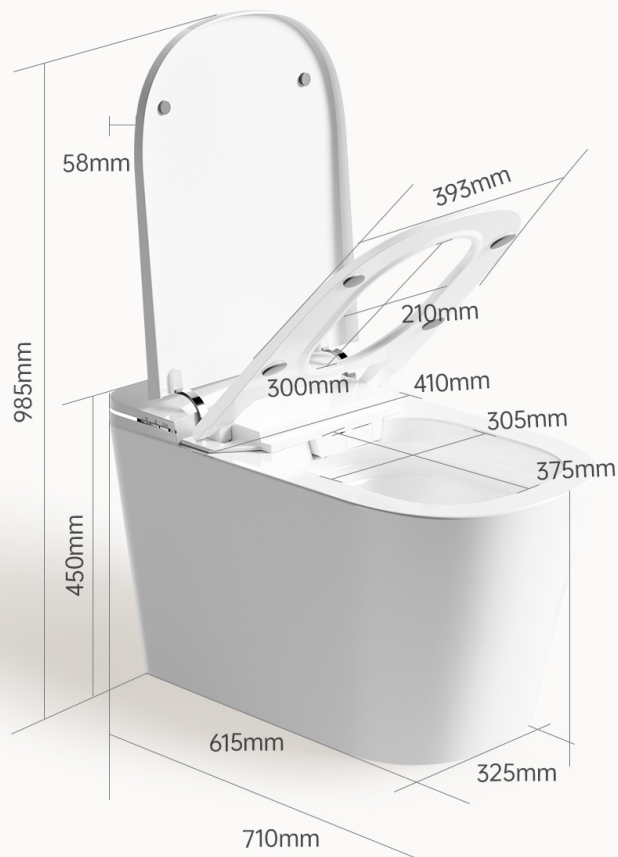

③ After the blowdown line is installed,
Glue both ends and secure.

④ The wall row smart toilet is installed.

SMART TOILET

Voltage
AC220V/50Hz
