Improve user experience

Water Filtration

Cleaning is more hygienic

Aromatherapy spray

Deodorization

NO WATER
PRESSURE

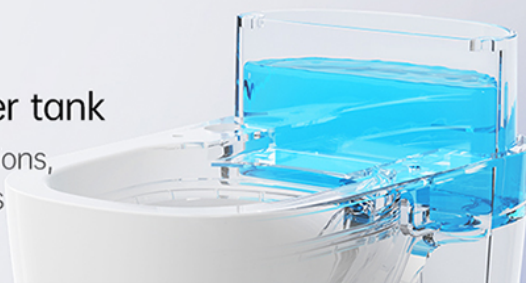

New upgrade 2.0 no water pressure limitation

Built-in water tank for enhanced power and silent flushing

Large capacity water tank

No water pressure restrictions,
Not picky about conditions

Two-times flushing

first time vortex flushing,
second time jet flushing

Silent flushing technology

Built-in low-noise flushing accessories, strong power, water saving and noise reduction, using toilet at night will not affect the sleep of your family

Low noise and high efficiency flushing accessories

Light touch flushing, low water filling noise, high flow rate, strong and durable

Significantly reduce 25dB (A)

Smart toilet noise is as low as 55dB*

55dB(A)

Traditional toilet flushing noise 80dB*

80dB(A)

FOAM SHIELD

SMART TOILET

splash-proof foam layer

The fine foam layer covers the water surface, dirt falls without splashing, and it isolates odors and prevents splashing

Hidden foam bottle

Open the back cover to replace the whole bottle, easy to operate

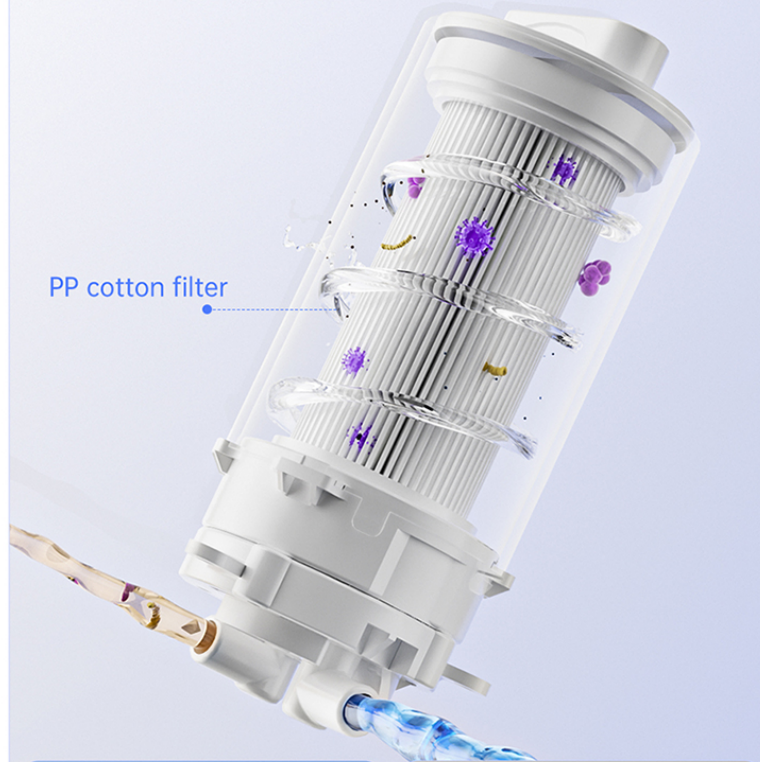

External foam bottle

The pipelines are exposed, which affects the appearance and is not conducive to cleaning.

Scale-removing and sterilizing filter element makes water more hygienic

Built-in professional water purification filter, using nano-grade PP cotton filter element to filter impurities in the water and reduce health risks caused by direct cleaning

VS

Clean PP cotton filter

Hygienic and clean without blocking water pipes

No filter cleaning

The water quality turns yellow and the water pipes are clogged.

Easy replacement

Just switch it and you can take it out

*It is recommended to replace the filter element every six months, depending on the frequency of use and local water quality.

Mist aromatherapy removes odors, making the whole process of going to the toilet more comfortable

Innovative aromatherapy atomization technology,
effectively removes odors

Flip lid to add aromatherapy liquid

Open the lid to add aromatherapy liquid, and close the lid after adding.

Ultraviolet sterilization, protect your health

Close the lid to start UV sterilization, killing bacteria in all directions

E. coli

99.9%

Antibacterial rate

Staphylococcus aureus

99.9%

Antibacterial rate

Candida albicans

99.9%

Antibacterial rate
